THE AUBIN PORTABLE GAS WORKS are now admitted to be the best known, whether for private houses or for villages, because of their simplicity of construction and operation, their freedom from smell, and their unequated economy; they do not require mechanical skill or constant attendance; they will work night and day if required—never clog the pipes, and cannot expende; they generate gas from any naterial containing it. These great savantages, in connection with the fact that with a working plan any experienced worker in metal can set up the works, make right under our paterias a safe and prefitable investment. Parties in search of business will do well to investigate. If they do they will buy. We refer to cur works in operation on the steamer Isaxe Newton, at the Delavan House, Albany, and in many other places. In a few weeks they will be in use for several villages tow in a solitation.
